Setting up your iPad to work with zoom

1. Connect your iPad to your computer or another device. Enter your passcode, if you have one, to unlock your iPhone, iPad, or iPod touch.

2. Select your device in Finder and click Trust, or if you're using iTunes, click Continue.

3. On your iPad confirm that you allow your computer or other device to access your data by tapping trust.

4. In zoom, click on share screen, then iPhone / iPad via air play. This seems to work much better than via cable, but you might try cable as well in a trial zoom session with a friend.

5. Pull down from the upper right corner of the iPad screen, or for OS11 or earlier, from the bottom of the screen.

6. Choose screen mirroring and select you computer

7. Press the home button on the iPad.

8. Choose your drawing / note-taking software, e.g., GoodNotes.
